College information. Application and scholarship deadlines. College visitations.

Parent financial aid training date of Dec. 9 at 6:00

## Colville Tribal scholarship opportunities

### Native American Display

Three ancient grinding stones with hand grinder are on display at Lake Roosevelt. They were donated by Cathy and Bruce Shields. These treasures have been part of their family for many many years. They were apparently found near the Dowels in Oregon many years ago. These grinding stones are on display in the LR Hallway along with traditional native toys and maps of our reservation.

### Navigation 101

We are continuing to meet with our student groups:

This week we reviewed the Career Day agenda and helped students choose speakers who will be most beneficial to their future.

### PLC Time

We are continuing to review state standards and data to identify areas of improvement. We are using this data to plan lessons and assessments targeted to the improvement area.

We are also reviewing new math curriculum during our math team meetings. Next week we would like to meet with Keller, Nespelem, Paschal Sherman and the Middle School to brainstorm ideas about how to work together to improve student performance in mathematics.

### School Improvement Plan:

We have reviewed our Lake Roosevelt Test Data and met in content areas to discuss. and digest the data. We have determined the areas of focus. We are still needing to look at science and the arts.
